

Properties of some $m - \mathcal{I}$ - closed sets and $m - \mathcal{I}$ - continuities

E. D. YILDIRIM and O. B. ÖZBAKIR

ABSTRACT.

In this paper, $m_\theta - \mathcal{I}$ and $m_\delta - \mathcal{I}$ -closed sets are introduced and their basic some properties are obtained. Also, some classes of generalized closed sets via the associated $m_\theta - \mathcal{I}$ and $m_\delta - \mathcal{I}$ -closure of a set in an ideal minimal space are investigated and the relationships between these new sets are given. Furthermore, new continuities are defined in ideal minimal spaces. In addition, the study are substantiated by counterexamples.

Acknowledgements. Research has been supported by Ege University Research Project(2010/FEN/049).
