Coincidence and periodic point results in a modular metric space endowed with a graph and applications

Anantachai Padcharoen\textsuperscript{1}, Poom Kumam\textsuperscript{1,2} and Dhananjay Gopal\textsuperscript{3}

Abstract. In this paper, we present some results on the existence of coincidence and periodic point of $F$-contractive mappings in the framework of modular metric spaces endowed with a graph. We also present an application to partial differential equations in order to support the theoretical results.

Acknowledgements The authors thank Editor-in-Chief and referee(s) for their valuable comments and suggestions, which were very useful to improve the paper. The first author thanks for the support of Petchra Pra Jom Klao Doctoral Scholarship Academic for Ph.D. Program at KMUTT. This work was carried out while the third author (Dr. Gopal) was visiting Theoretical and Computational Science Center (TaCS), Science Laboratory Building, Faculty of Science, King Mongkut’s University of Technology Thonburi (KMUTT), Bangkok, Thailand, during 15 October–8 November, 2015. He thanks Professor Poom Kumam and the University for their hospitality and support.

All authors contributed equally to this paper.
