

Creative Mathematics and Informatics

CONTENTS

Vol. 26 (2017) No. 1

A. M. Abd El - Latif

Supra soft b-connectedness II:

Some types of supra soft b-connectedness 1 - 8

P. N. Agrawal and Pooja Gupta

Durrmeyer variant of q-Favard-Szász operators based on Appell polynomials 9 - 17

Mohd Arif Raza and Nadeem ur Rehman

A note on an Engel condition with derivations in rings 19 - 27

Dan Bărbosu and Dan Miclăuș

On the Stancu operators and their applications 29 - 36

Vasile Berinde

Gazeta Matematică: international impact and visibility 37 - 44

Carlos Carpintero, John Moreno and Ennis Rosas

Some new types of decomposition of continuity 45 - 52

Paula Carvalho and Paula Rama

The modified Schultz index of graph operations 53 - 60

Ovidiu Cosma, Gheorghe Ardelean and Adrian Petrovan

Strong image steganography based on last significant bit substitution 61 - 67

V. Kaladevi , R. Murugesan and K. Pattabiraman

Reverse degree distance of some graph operations 69 - 78

A. Kandil , M. M. Yakout and Amr Zakaria

Generalized rough relations via ideals 79 - 84

Ștefan Mărușter

A note on the convergence of Mann iteration 85 - 88

Shyamapada Modak and Ahmad Al-Omari

On a new operator on filter generalized topological spaces 89 - 94

Anantachai Padcharoen , Poom Kumam and Dhananjay Gopal

*Coincidence and periodic point results in a modular metric space
endowed with a graph and applications* 95 - 104

Ebrahim Zamani and Hamid Vaezi

Composition operators between different weighted Besov spaces 105 - 114

ISSN 1584 - 286X
