## CONTENTS

Vol. 28 (2019) No. 2

- ANDREI BOZĂNTAN and VASILE BERINDE  
*A comparative study of the PL homotopy and BFGS methods for some nonsmooth optimization problems* . . . . 97 - 104
- ERDAL GÜL and MEHMET AÜLBAYRAK  
*Abel extensions of some classical Tauberian theorems* . . . . . 105 - 112
- ESRA GÜLLE and UĞUR ULUSU  
*Wijsman quasi-invariant convergence* . . . . . 113 - 120
- ANDREAS HOLZINGER, MARKUS PLASS, KATHARINA HOLZINGER, GLORIA CERASELA CRIȘAN,  
CAMELIA-M. PİNTEAE and VASILE PALADE  
*A glass-box interactive machine learning approach for solving NP-hard problems  
with the human-in-the-loop.* . . . . . 121 - 134
- ADEWALE OLUSOLA KAYODE, OLALERU JOHNSON, OLAOLUWA HALLOWED and AKEWE HUDSON  
*Fixed point theorems on a  $\gamma$ -generalized quasi-metric spaces* . . . . . 135 - 142
- FATİH NURAY and UĞUR ULUSU  
*Lacunary invariant statistical convergence of double sequences of sets* . . . . . 143 - 150
- K. PATTABIRAMAN  
*Distance based topological descriptors for two classes of graphs* . . . . . 151 - 162
- K. R. PRASAD and MD. KHUDDUSH  
*Existence of countably many symmetric positive solutions for system of  
even order time scale boundary value problems in Banach spaces.* . . . . . 163 - 182
- COSMIN SABO, ANDREI HORVAT-MARC and PETRICĂ C. POP  
*Comments on "A two-stage supply chain problem with fixed costs: An ant colony optimization approach"  
by Hong et al. International Journal of Production Economics (2018)* . . . . . 183 - 189
- T. M. M. SOW  
*A modified Krasnoselskii-Mann algorithms for computing fixed points  
of multivalued quasi-nonexpansive mappings in Banach spaces* . . . . . 191 - 198
- IOANA TAȘCU  
*On the existence of antiderivatives of some real functions* . . . . . 199 - 202
- AHMET TEKCAN  
*Sums and spectral norms of almost balancing numbers* . . . . . 203 - 214
- MUSTAPHA FATEH YAROU  
*Reduction approach to second order perturbed state-dependent sweeping process* . . . . . 215 - 221
- SORINEL DUMITRESCU  
*Note on the paper  
"An improvement of Batir's asymptotic formula and some estimates related to the gamma function"* . . . . . 222 - 222
