

The title of papers

AUTHOR(S) NAME

ABSTRACT. In this paper we give an example of manuscript prepared in L^AT_EX.

1. INTRODUCTION

This is an example of manuscript in L^AT_EX in form required by the publisher of the *Carpathian Journal of Mathematics*.

Caution! It is necessary to use the package `cmib5c.sty`. To use it properly, the file `creativ.sty` it must be put in the same directory with your `tex`. support. This package introduced new commands

- i) `unabstract` is the command for `abstract` environment;
- ii) `coordinates` this can be added afterwards by publisher;
- iii) `date` this command put the submission date, this can be added afterwards;
- iv) `undate` this command put the revised date, this can be added afterwards;
- v) `adate` this command put the accepted date, this can be added afterwards;
- vi) `corauthor` this command put the corresponding author.

Figures are welcome in PostScript form, especially `.eps` and `.png` files.

Theorem 1.1. *This is an example of Theorem.*

Proof. This is an example of proof for a Theorem, Lemma, Corollary and Proposition. Follows an example of enumerated equation

$$(1.1) \quad E = mc^2$$

□

Lemma 1.1. *This is an example of Lemma.*

2. MAIN RESULTS

Example 2.1. This is an example of Example.

Definition 2.1. This is an example of Definition.

Remark 2.1. This is an example of Remark.
